13th INTERNATIONAL TECHNO-UROLOGY MEETING (TUM) THE ADVENT OF AI FOR THE SURGICAL DECISION SUPPORT 30th - 31st January 2025

**Aula Convegni S. Luigi Gonzaga Hospital
Orbassano, Turin, Italy**

INTRODUCTION

Dear Friends,

We are pleased to invite you to the 13th edition of the TECHNO-UROLOGY MEETING, scheduled for January 30th-31st, 2025, at the San Luigi Gonzaga University Hospital in Orbassano, Turin.

Over the years, our efforts have been focused on advancing laparoscopic and robotic urologic surgery through the integration of new technologies and surgical expertise.

This year, we are introducing several key developments aimed at further personalizing surgical approaches, making procedures less invasive and more adaptable.

A significant addition in this regard is the use of the Da Vinci single-port robotic system during live surgery, an important step toward refining surgery to be even more "tailored" to the specific needs of each patient.

We remain committed to improving both the preoperative and intraoperative experience for surgeons.

In this context, we have continued to refine virtual platforms that facilitate communication and collaboration among surgeons, regardless of their physical location.

Since 2022 we embarked in developing the Uro-Verse, a digital environment dedicated to urology. In this virtual space, surgeons can discuss together complex clinical cases, leveraging highly detailed 3D virtual models that now replicate not only anatomical structures but also the physical textures of organs, providing a more comprehensive preoperative planning experience.

For this edition of the congress, we have implemented the use of our "digital twin" organ models for the intraoperative assistance in an augmented reality setting, enhancing their usefulness in surgical navigation.

In addition to these advancements, we are introducing a huge innovation to further improve pre-surgical planning.

This includes the integration of an AI-powered digital avatar, which uses machine learning algorithms to analyze individual clinical cases and provide tailored recommendations for the intraoperative strategy to be followed for each specific case, while also predicting potential outcomes.

This represents a new milestone in combining artificial intelligence with surgical decision-making.

All these considered, we believe that the 13th edition of TUM will offer valuable insights into the latest surgical technologies and innovations.

With the participation of top-level surgeons from all around the world, we look forward to provide a great experience for all attendees.

We hope to see you in Turin for this upcoming edition of TUM, and we trust that the program will meet your expectations.

Sincerely,

A handwritten signature in black ink, appearing to read 'F. Porpiglia'.

DIVISION OF UROLOGY - DEPARTMENT OF ONCOLOGY UNIVERSITY OF TURIN

The Department of Oncology at University of Turin, is composed by professionals, from preclinical to translational research and clinic assistance for oncological diseases. It is sited in San Luigi Hospital and IRCC Candiolo Institute.

The Urology team, that takes part into the Department of Oncology, manages all uro-oncological and all others genito-urinary diseases. The most recent and modern technologies are available for diagnosis and treatment of such of them.

Robotic and laparoscopic surgery have been developed in the last years, being San Luigi Hospital's Urology Division a pioneer Centre for many techniques, especially in the setting of translational surgery.

Together with the clinical activity, also the teaching activity has a primary role, being our Department the Center for the Urology Residency Program.

Our Staff is continuously involved and invited to attend the most prestigious International and National Meetings.

Our intensive scientific and research activity is widely recognized as demonstrated by the publications in the most famous international peer-reviewed journals.

ITALIAN ECM ACCREDITATION

The 13th INTERNATIONAL TECHNO-UROLOGY MEETING has been accredited by the Italian Ministry of Health.

The Italian Ministry of Health assigned n. 18 ECM Credits (2-Linee guida-protocolli-procedure).

The Congress will be accredited for the following specialties:

- Oncology
- Radiotherapy
- Urology
- Pathological anatomy
- Radiodiagnostics

In order to receive Italian credits participants must attend 90% of the event and pass the final test.
